How to Use Claude AI

to Create Beautiful Slides

From Beginner to Professional Level

Elijah Otor

Creator of iDreamStudio • @ElijahTaughtMe • #generativeai • #aiartcommunity

Grow with Google Champion | 9,000+ Students Trained | Published Prompt Journal Author

"Prompt engineering is the new superpower. Master it and every blank slide becomes an opportunity."

About the Author

Elijah Otor — AI Educator, Prompt Specialist & iDreamStudio Creator

Elijah Otor is a tech enthusiast, AI educator, Prompt Technique Specialist, and AI & Machine Learning Researcher, specializing in AI for Brand and Product Design as well as AI Movies.

iDreamStudio: Creator of iDreamStudio (idreamstudio.app) — empowering brands, product designers, and content creators to leverage AI and prompt engineering for compelling content, digital art, and high-converting ad campaigns.

Training Impact: Trained 9,000+ students and job seekers on digital skills. Mentored 20 business owners in Thamesmead, London. Guided 150+ SMEs on social media strategy and AI productivity tools.

Publications: Published 'Prompt Journal' and 'Prompt Journal for Children.' Contributed to 'AI and Human Rights: Building a Tech Future' (2022) and 'Responsible Tech Guide' (2023).

Awards: Grow with Google Champion. Most Active Trainer on Social Media, 2017 (Google Digital Skills). Winner, Deep Agent Competition — Web/App Development, June 2025 (Abacus).

Communities: Founder of Lettechit (t.me/lettechit) and Aiartcommunity (t.me/+9VnMpkH2yFoyYzQ0) Telegram groups for AI learning and generative art collaboration.

Tools Built: SecretSquirrel (prompt/password security), ResearchToContent AI (res2content.site) — transforms research into blog posts, Twitter threads, and LinkedIn content.

Education: Diploma in Artificial Intelligence (SIITGLOBAL). BSc Microbiology, University of Benin. Verified credentials from Google, HubSpot, SEMrush, Alison in digital marketing, social media, network security, and Generative AI.

Introduction: Why Claude AI for Slide Creation?

Imagine describing your ideal presentation in plain English and watching it take shape in seconds. That is the power Claude AI brings to your workflow — and Elijah Otor, creator of iDreamStudio, has been teaching this exact approach to thousands of professionals, students, and business owners across Africa and beyond.

Claude AI, developed by Anthropic, understands complex instructions, generates structured content, writes speaker notes, suggests visual layouts, and produces slide-ready scripts — all through natural conversation. Pair it with iDreamStudio and you have a complete AI-powered creative pipeline.

What Claude AI Does for Your Presentations

- Content Generation: Outlines, talking points, data summaries, and narratives in seconds

- Design Guidance: Color palettes, typography pairings, image briefs, and layout directions
- Tool Integration: Works alongside PowerPoint, Google Slides, Canva, Gamma.app, and iDreamStudio
- Iteration Speed: Refine in real time through back-and-forth conversation
- AI Visual Pairing: Claude writes the brief; iDreamStudio generates the matching visual

> **Elijah's Take:** *"People treat AI like a magic button. The real secret? Specific prompts + clear intent + relentless iteration. Master prompt engineering and you've mastered the future of content creation."*

Beginner Level: Your First Steps

Welcome to the starting line. This section assumes zero experience with AI tools. You'll access Claude, write your first prompt, and build a complete presentation — the Elijah Otor iDreamStudio way.

1.1 Accessing Claude AI

1. Visit claude.ai in any browser — create a free account
2. Click 'New conversation' — this is your prompt window
3. Type your request in plain English. Claude responds immediately
4. Copy output into PowerPoint, Google Slides, Canva, or Gamma.app
5. Use iDreamStudio (idreamstudio.app) to generate matching AI visuals

> ✅ No install needed. Runs entirely in your browser. For automation, use the API at docs.anthropic.com.

1.2 The Anatomy of a Good Prompt

Think of Claude as a highly capable assistant that needs context. Always include:

- Topic: What is the presentation about?
- Audience: Who will see it? (SMEs? Students? Investors?)
- Length: How many slides?
- Tone: Creative, professional, educational, inspiring?
- Format: Bullets? Tables? Data callouts?

1.3 Walkthrough: 4-Slide Beginner Deck

Step 1 — Outline Prompt

```
"Create a 4-slide presentation outline about AI tools for small businesses.
Tone: practical and encouraging. Audience: Nigerian SME owners.
Include: title, why AI matters, top 3 tools, call to action."
```

Step 2 — Expand Content

```
"Write 3 bullet points per slide. Max 12 words each.
Add a background image description for each slide."
```

Step 3 — Speaker Notes

```
"Write 2-3 conversational speaker notes per slide,
as if I'm a trainer speaking to Nigerian entrepreneurs."
```

Step 4 — iDreamStudio Integration

```
"Write a detailed image prompt I can use in an AI art generator
to create the hero visual for slide 1. Style: modern, professional,
vibrant. Subject: African entrepreneur using AI on a laptop."
```

6. Paste Claude's image prompt into iDreamStudio (idreamstudio.app)
7. Download the generated visual and add to your slide
8. Transfer all text content into your chosen slide platform

1.4 Common Pitfalls — Elijah's Fix List

❌ Vague prompts → ✅ Always include topic, audience, and tone
❌ Too much text per slide → ✅ Ask: '3 bullets max, 12 words each'
❌ Skipping speaker notes → ✅ Always request them — they save you
❌ Accepting first draft → ✅ Iterate: 'Make this more punchy/concise'
❌ Trusting every AI statistic → ✅ Verify all data before presenting
❌ Ignoring visuals → ✅ Use iDreamStudio for custom AI art per slide

1.5 Beginner Prompt Library

Prompt 1 — Quick Outline

```
"Create a [N]-slide outline on [TOPIC] for [AUDIENCE].
Tone: [TONE]. Include a hook, core content, and a CTA."
```

Prompt 2 — Slide Bullets

```
"Write 3 concise bullet points for a slide titled '[TITLE]'.
Each bullet: max 12 words."
```

Prompt 3 — iDreamStudio Image Brief

```
"Write a detailed image prompt for an AI art generator.
Slide topic: [TOPIC]. Style: [modern/vibrant/minimal].
Subject: [describe the visual concept]."
```

Prompt 4 — Speaker Notes

```
"Write conversational speaker notes for this slide: [paste content].
Tone: trainer speaking to [AUDIENCE]. Under 65 words."
```

Prompt 5 — Closing CTA Slide

```
"Write a compelling closing slide for a presentation on [TOPIC].
Include a memorable one-liner and a specific call to action."
```

Intermediate Level: Building Depth & Polish

You have the basics. Now let's create presentations that genuinely stand out — with advanced prompting, design integration, and Elijah's signature iDreamStudio visual workflow.

2.1 Advanced Prompting Techniques

Role Assignment

```
"Act as an expert AI branding consultant for Nigerian SMEs.
Write slide content that is practical, jargon-free, and action-oriented."
```

Constraint + Format Rules

```
"Rewrite this slide using exactly 3 bullets.
Each starts with an action verb. Maximum 10 words each.
Remove all filler words."
```

iDreamStudio Prompt Engineering

```
"Write a detailed Midjourney/iDreamStudio prompt to generate the
hero image for a slide about generative AI in brand design.
Include: subject, style, lighting, color palette, aspect ratio."
```

Before & After — The Prompt Upgrade

❌ BEFORE (Vague)	✅ AFTER (Role + Constraint)
AI tools are very useful for businesses and can help them do many things better in today's fast-changing digital world.	Cuts content creation time by up to 70% Produces scroll-stopping AI ads in minutes Gives SMEs enterprise-level creative power

2.2 Design Elements via Claude Prompts

Design Brief Prompt

```
"Create a visual brand brief for a presentation on generative AI for brands.
Audience: product designers and content creators.
Include:
- Primary hex color
- Secondary hex color
- Accent hex color
- Background and text colors
- Font pairing (heading + body)
- Icon style (line art / filled / 3D)
- Photography direction (subject, mood, lighting)"
```

2.3 Integrating with Slide Platforms

9. Ask Claude to format output as a numbered slide list
10. Copy content to a plain text reference file
11. PowerPoint: Insert > Outline to import structured content
12. Google Slides: Paste slide by slide, Notes panel for speaker text
13. Gamma.app: Paste Claude outline directly — Gamma auto-designs the layout
14. iDreamStudio: Use Claude's image briefs to generate custom visuals per slide

2.4 Intermediate Prompt Library

Prompt 6 — Role + Audience

```
"As an expert AI branding consultant, explain [CONCEPT] for product designers.
No jargon. Include 1 real brand example per slide."
```

Prompt 7 — Data Slide

```
"Write content for a stat-driven slide about [TOPIC].
3 key metrics, formatted as large callout numbers with brief labels.
Suggest a chart type."
```

Prompt 8 — Comparison Table

```
"Create a side-by-side comparison: [OPTION A] vs [OPTION B].
4 criteria. Format as a table with check marks and X marks."
```

Prompt 9 — AI Art Brief for iDreamStudio

```
"I need an image brief for iDreamStudio/Midjourney for a slide titled '[TITLE]'.
Describe: subject, composition, color palette, mood, lighting, style, aspect
ratio."
```

Prompt 10 — Refine Content

```
"Improve this slide: [PASTE CONTENT].
Make it 30% shorter, more visual-ready, and punchy.
Show before and after."
```

Prompt 11 — Slide Transition Script

```
"Write a 1-sentence verbal bridge the presenter says
between slide [N] about [TOPIC A] and slide [N+1] about [TOPIC B]."
```

Professional Level: Command the Room

At this level, you engineer presentations that persuade, inspire, and close deals. This is where Elijah's AI research background, iDreamStudio workflows, and deep prompt expertise create something truly exceptional.

3.1 Expert Strategies

Prompt Chaining

```
Step 1: "Generate a narrative arc for a 15-slide brand pitch."
Step 2: "For the Problem slide, create visceral urgency using a real customer
pain."
Step 3: "Write rebuttals for the top 3 skeptic objections."
Step 4: "Condense financials into 3 key metrics, 1-sentence explanations."
Step 5: "Review as a skeptical Series A investor. Score and rewrite 3 weakest
slides."
```

iDreamStudio Visual Pipeline

```
Step 1: Claude generates full slide outline + text content.
Step 2: Claude writes iDreamStudio/Midjourney image briefs for each slide.
Step 3: iDreamStudio generates AI visuals from the briefs.
Step 4: Combine text + visuals in Canva, PowerPoint, or Google Slides.
Result: A fully branded, AI-generated, professional presentation.
```

SCORE Framework — Elijah's Signature Structure

S — Story: Open with a compelling narrative or real case study
C — Conflict: Name the problem clearly and make the audience feel it
O — Options: Present 2-3 possible paths forward
R — Resolution: Show why your solution is the clear winner
E — Emotion: Close with what this transformation means personally

Prompt: "Restructure this outline using the SCORE storytelling framework for [AUDIENCE]: [PASTE OUTLINE]"

3.2 Professional Case Study: Brand Pitch (15 Slides)

Brand: **iDreamStudio — AI Creative Platform for Brands, Designers & Content Creators**

```
SLIDE 1 — Cover
"Write a punchy 7-word tagline for an AI creative platform for brands."

SLIDE 2 — The Problem
"Problem slide: why brand design is slow, expensive, and generic without AI.
Start with a shocking industry stat. 3 bullets. Create real urgency."
```

```
SLIDE 3 — The Solution: iDreamStudio
"Explain iDreamStudio's value in 3 non-technical bullets.
Use a 'personal creative director' analogy."

SLIDE 4 — How It Works (3-Step Flow)
"Describe the iDreamStudio workflow: Input prompt → AI generates → Brand gets
results.
1 sentence each. Visual flow format."

SLIDES 5-6 — Market Opportunity
"Global AI creative market: TAM, SAM, SOM with realistic figures.
Format as bold callout numbers."

SLIDE 7 — Traction
"6 metrics: users, content pieces generated, ad campaigns run,
brand partners, NPS, monthly growth. 2x3 callout grid."

SLIDES 8-9 — Business Model + Competitive Landscape
"Freemium, Pro ($19/mo), Agency tier. Then: compare vs Canva,
Adobe Firefly, Midjourney on 5 criteria."

SLIDES 10-12 — Team, Roadmap, Financials
"Team slide emphasizing AI + brand expertise.
12-month roadmap by quarter.
3-year projections: Revenue, MRR, Active Brands."

SLIDES 13-15 — The Ask, Risks, Closing Vision
"Raising $2.5M seed. Use of funds (4 categories).
Risk mitigation (3 risks + strategies).
Close: the world where every brand creates without limits."
```

3.3 Professional Prompt Library

Prompt 12 — Executive Summary

```
"Write a 60-word investor email summary of this pitch: [PASTE OUTLINE].
Hook in first sentence. Include the ask in last sentence."
```

Prompt 13 — Objection Handling

```
"List the 5 most likely objections to this pitch.
For each: 2-sentence rebuttal for speaker notes."
```

Prompt 14 — iDreamStudio Full Visual Brief

```
"For each of these 15 slides: [PASTE TITLES],
write a complete iDreamStudio/Midjourney image prompt.
Include style, subject, palette, mood, and aspect ratio."
```

Prompt 15 — Accessibility + Ethics Review

```
"Review this slide content for accessibility and AI ethics.
Flag: low-contrast issues, unverified AI claims, complex language.
```

```
Suggest improvements for each."
```

Prompt 16 — Multi-Audience Version

```
"Rewrite this slide for 3 audiences:
(1) Investors — focus on ROI and market size
(2) Brand owners — focus on time/cost savings
(3) AI community — focus on technical innovation"
```

Prompt 17 — Q&A Preparation

```
"Generate 12 likely audience questions for this presentation.
For each: a strong 2-3 sentence answer and 1 follow-up response."
```

Prompt 18 — Full Slide Audit

```
"Audit these 15 slides: [PASTE].
Score each 1-5 on: clarity, visual impact, persuasion.
List top 3 improvements. Rewrite the 3 lowest-scoring slides."
```

Best Practices & Elijah's Pro Tips

4.1 Core Prompt Engineering Principles

- Be Specific: 'A 5-slide deck for Lagos-based product designers using Canva' beats 'a design presentation'
- Use Constraints: Word limits, bullet counts, and format rules produce tighter, more usable output
- Iterate Relentlessly: Never settle for the first draft — ask Claude to improve, shorten, or reframe
- Provide Context: Share your audience, goal, brand voice, and any existing content
- Chain Your Prompts: One massive prompt often underperforms a series of focused, sequential ones

> **Elijah's Rule:** *If Claude gives you something good, ask it to make it great. Then ask if there's a version that's even more surprising. Prompt engineering is iterative by nature — that's not a bug, it's the feature.*

4.2 The iDreamStudio + Claude Workflow

Claude AI (The Brain)	iDreamStudio Ecosystem (The Visual)
Claude generates slide outlines and text	iDreamStudio generates AI visuals from briefs
Claude writes detailed image briefs	Canva or PowerPoint assembles the final deck
Claude creates speaker notes and Q&A prep	Gamma.app auto-designs from Claude outlines
Claude audits and rewrites weak slides	ResearchToContent AI turns docs into slide-ready copy

4.3 Ethical Considerations

- Always verify statistics and data — Claude can generate plausible but incorrect figures
- Disclose AI assistance if required by your institution, employer, or event organizers
- When using AI-generated visuals, check for bias or misrepresentation in generated imagery
- Refer to Elijah's contributions to 'AI and Human Rights' (2022) and 'Responsible Tech Guide' (2023) for deeper frameworks

4.4 Troubleshooting

Issue: Output too long for slides

```
Fix: "Rewrite as bullets only. Max 5 bullets. 10 words each. No prose."
```

Issue: Tone doesn't match brand

```
Fix: "Here are 3 examples of our brand voice: [examples].
```

```
Rewrite this slide in that exact same voice and energy."
```

Issue: Visuals feel generic

```
Fix: "Write a specific iDreamStudio prompt for this slide.
Avoid generic stock photo aesthetics. Be concrete:
setting, subject, lighting, color palette, mood."
```

Conclusion: Your Creative Superpower Awaits

You have just unlocked a fundamentally different way to create presentations. With Claude AI as your thinking engine and iDreamStudio as your visual powerhouse — guided by the frameworks, prompts, and real-world expertise in this guide — the blank slide is no longer a problem. It is an invitation to create something the world has not seen before.

Key Takeaways

- Specific prompts always outperform vague ones — add topic, audience, tone, and format
- Iterate relentlessly — the first draft is the starting line, not the finish line
- Combine Claude + iDreamStudio for a complete AI-powered content and visual workflow
- Verify all AI-generated statistics and claims before presenting them
- Build a personal prompt library — your best prompts are your competitive edge

Your Next Steps

15. Practice all 3 levels in this guide with your own real topics
16. Try the full iDreamStudio + Claude workflow on one deck this week
17. Join Lettechit on Telegram (t.me/lettechit) for daily AI tools and opportunities
18. Join Aiartcommunity (t.me/+9VnMpkH2yFoyYzQ0) for generative AI art collaboration
19. Follow Elijah at #ElijahTaughtMe for ongoing prompt tips
20. Explore ResearchToContent AI (res2content.site) to turn research into ready-to-publish content

> The world's most compelling presentations are made by people who know their audience, their tools, and how to tell a story that moves people to action.
>
> You now have all three. Go build something remarkable.

10 Reusable Prompt Templates

These are the exact frameworks Elijah Otor uses with iDreamStudio clients and training participants. Copy, customize, and make them yours.

Template 1 — Quick Outline

Quick Outline

```
"Create a [N]-slide presentation on [TOPIC] for [AUDIENCE].
Tone: [TONE]. Include: title, [CORE SECTIONS], closing CTA."
```

Template 2 — Slide Bullets

Slide Bullets

```
"Write [N] bullet points for slide titled '[TITLE]'.
Each bullet: max [WORD LIMIT] words. Start with an action verb."
```

Template 3 — iDreamStudio Visual Brief

AI Visual Brief

```
"Write a detailed image prompt for iDreamStudio/Midjourney.
Slide topic: [TOPIC]. Style: [aesthetic]. Subject: [describe].
Color palette: [colors]. Mood: [mood]. Aspect ratio: 16:9."
```

Template 4 — Speaker Notes

Speaker Notes

```
"Write speaker notes for: [PASTE SLIDE CONTENT].
Tone: [CONVERSATIONAL/EXPERT]. Max [WORD COUNT].
Add a verbal transition to the next slide about [NEXT TOPIC]."
```

Template 5 — Data Slide

Data Slide

```
"Create a data slide about [TOPIC]. Include [N] key stats.
Format as bold headline numbers with 1-line labels below.
Suggest the best chart type for this data."
```

Template 6 — Comparison Table

Comparison Table

```
"Build a comparison slide: [OPTION A] vs [OPTION B].
```

```
Evaluate on [N] criteria.
Format: table with check marks, X marks, or 1-5 ratings."
```

Template 7 — Storytelling Hook

Storytelling Hook

```
"Write an opening slide for a presentation on [TOPIC].
Start with a [shocking stat / bold question / 1-sentence story].
Audience: [AUDIENCE]. Goal: make them physically lean forward."
```

Template 8 — Persuasive Pitch

Persuasive Pitch Slide

```
"Write a persuasive slide for [PRODUCT/IDEA].
Audience: [AUDIENCE]. Structure:
- Here is the painful problem
- Here is what inaction costs
- Here is why our solution wins"
```

Template 9 — Content Refinement

Content Refinement

```
"Improve this slide: [PASTE CONTENT].
Make it [30% shorter / more punchy / more visual / AI-art-ready].
Show the before and after clearly."
```

Template 10 — Elijah's Master Workflow Chain

Full Workflow Chain

```
Step 1: "Create [N]-slide outline for [TOPIC]. Audience: [A]. Goal: [G]."
Step 2: "Expand each slide: content, bullets, visual description."
Step 3: "Write iDreamStudio image briefs for each slide."
Step 4: "Write speaker notes for the full deck."
Step 5: "Create design brief: palette, fonts, icon style."
Step 6: "Review as [PERSONA]. Score + rewrite 3 weakest slides."
```

The best prompt is the one you personalize to your audience, your brand, and your goal.
Use these templates as starting points — then make them unmistakably yours.
